Fullstack developer specialized in backend technologies and creating solutions that prioritize user experience while ensuring server security. I enjoy working in teams and relish challenges that involve goal achievement and problem-solving.

PROJECTS

Fullstack Web - Discount Dash

sep. 2023 - oct. 2023

Academic experience. Henry Bootcamp

An application that sells products near their expiration date at reduced prices, helping reduce food waste and save money. It offers a wide variety of products and promotes local shopping, providing both economic and ecological benefits.

In this project, I had to lead the backend team, organize the database structure, maintain an organized Git workflow, and research the new technologies that I and my colleagues had to face.

Front: Next.js, Redux Toolkit, Typescript, Firebase

Back: Next.js, Typescript, Firebase

Database: Firebase
